

Occupational Health, Safety, and Environmental Policy

Bilgi Birikim Sistemleri, in line with its total quality approach and in compliance with relevant laws and regulations, has established its Occupational Health, Safety, and Environmental Policy to protect and safeguard its employees, customers, and suppliers.

Growing with Environmental Awareness

While planning new investments, expanding operations, and developing its technological infrastructure, **Bilgi Birikim Sistemleri** utilizes technologies and methods that minimize negative environmental impacts as much as possible.

Awareness of Health, Safety, and Environment

Bilgi Birikim Sistemleri primarily focuses on raising awareness and sensitivity among its employees regarding occupational health and safety as well as environmental issues.

Managing Risks

Bilgi Birikim Sistemleri identifies the occupational health, safety, and environmental risks associated with all its activities and prepares plans accordingly to take preventive measures before incidents such as environmental pollution, work accidents, and occupational diseases occur. In this context, an **Occupational Health and Safety Committee** has been established within Bilgi Birikim Sistemleri. The company continues and will continue its operations with the support of employed **Occupational Safety Specialists** and **Workplace Physicians**.

Leaving a Livable World for Future Generations

Bilgi Birikim Sistemleri acts not only with consideration for today but also with a sense of responsibility toward future generations.

Waste Recycling

Within the scope of waste recycling, **Bilgi Birikim Sistemleri** carefully selects recyclable materials and contributes to recovery efforts with the support of **Istanbul Metropolitan Municipality**. BBS also collects used batteries within the company and ensures their delivery to authorized collection centers while informing its employees about the subject.

Monitoring

Bilgi Birikim Sistemleri aims to monitor and measure its occupational health, safety, and environmental performance.
